

max stabilization energy

circle-like shape

Molecular Orbital Energy $\approx 2 \cdot E^\pi \cdot \cos \left(\frac{(\text{MO #}) \cdot \pi}{(\# \text{ of p-orbitals}) + 1} \right)$

$$\text{Molecular Orbital Energy} \approx 2 \cdot E^\pi \cdot \cos \left(\frac{(\text{MO #}) \cdot \pi}{(\# \text{ of p-orbitals}) + 1} \right)$$
